**Novelty:** The remote monitoring system (1) receives running state information and abnormality generation information of a refrigerating cycle and transmits received information to registered user terminals (7,8) through internet.

**Use:** Remote monitoring system.

**Advantage:** Fault diagnosis or operation control of air-conditioner is done by simple installation.

**Description of Drawing(s):** The figure shows block diagram of remote monitoring system.

Remote monitoring system 1

Registered user terminals 7,8
